James:

Those numbers should be correct. We did have a meter change out for the water meter. We used the original meter to fill up a appx. 20,000 gallon frac tank at the very beginning of the project. I think that Rockette should have those numbers.

Thanks

Gary,

This meter was for the water usage? If so, then please confirm that EPA did not use any water at all since the meter reading in the attached report, dated May 27, 2015, remains 001012.

Also, please confirm that the final sewer service usage was 247,491.65 gallons per the same report.

James

Rockette:

We are ready to return the transient meter. Please give me the drop-off location. Also, my contractor provided the \$1000 deposit so the return check should go back to them. The return of the Deposit needs to be made to and sent to the following:

CB&I Federal Service
Project #: 500255
Attn: Steven Lavergne
2370 Towne Center Blvd.
Baton Rouge, LA 70806

Thanks
